

Edmark Tuazon

Website Developer | Email Campaign Developer

me.edmarktuazon@gmail.com | deved.onrender.com | github.com/edmarktuazon | linkedin.com/in/edmarktuazon

Experience as a front-end developer specializing in custom static and dynamic websites using Tailwind CSS, JavaScript, and Vue.js, with a focus on usability, performance, and responsive design. Expanded into full-stack development to support client projects requiring backend functionality, leveraging Node.js, Express.js, Firebase, Supabase, PHP, and MySQL, along with AI tools (Claude) to accelerate development. Experienced in server management including domain setup and deployment (GoDaddy, Namecheap, Hostinger). Additional background in email campaign development and legacy HTML email templates, ensuring cross-platform consistency and compatibility.

Work Experience

WHG Customer Services Philippines, Inc. / evoke plc

HTML Email Campaign Developer – Full-Time Hybrid

Oct. 2023 – Present

Manila, Philippines

Part of the Marketing Technology team, supporting the development and execution of targeted B2B and B2C marketing campaigns across US and international brands.

- Customize and implement legacy HTML and CSS email templates for targeted campaigns across brands, including WSOP, Mr. Green, and 888casino. Deploy the CRM-approved email templates to IBM Watson Campaign (Silverpop)/Acoustic Marketing Cloud for template IDs creation and internal testing.
- Modify site-wide HTML and CSS web-based pop-up message for WSOP, and Mr. Green brand website. Powered by the in-house Online Message Group (OMG) system. Configure the CRM-approved OMG template into the OMG system to generate unique template IDs.
- Create SMS and Push notifications content for WSOP, Mr. Green, and 888casino. Implement the CRM-approved SMS and Push using the in-house UCC Admin system to set up the sending name, language, message body, and ID generation.

Freelance

Full-Stack Developer – Freelance

Feb. 2022 – Present

International, Philippines

Deliver customized web solutions ranging from static websites to full-stack web applications, based on client requirements.

- Develop static and full-stack web applications based on client needs, building fully customized websites and web applications for corporations, startups, and personal projects.
- Convert UI/UX designs from Figma and other web design mockups into fully functional, responsive, and user-friendly web interfaces.
- Configure domains and hosting environments, manage DNS settings, and deploy web applications to production, ensuring proper server and hosting configuration for reliable website accessibility and performance.

Link Helpers SEO & Web Design Phoenix

WordPress & Wix Developer (Support) – Freelance Remote

Jan. 2026 – Jul. 2026

Phoenix Arizona, USA

Supporting the Web, SEO team and Owner & Chief Strategist by maintaining, troubleshooting, and optimizing existing websites.

- Perform website maintenance for WordPress and Wix websites, including content, image, and layout updates; conduct website performance audits using Google Page Speed Insights and troubleshoot front-end issues to maintain site functionality and performance.

Teamholix Communication Design Inc.

Frontend Web Developer – Contract Remote

Feb. 2023 – Mar. 2025

Manila, Philippines

Work closely with the Owner and Web Designer team to develop responsive and production-ready web interfaces by translating UI/UX designs into functional websites, followed by deployment, testing, debugging, and performance optimization.

- Convert Adobe XD UI/UX designs into fully functional web interfaces using HTML5, CSS3, Tailwind CSS/Bootstrap5, and vanilla JavaScript, with PHP includes for modular website structuring.
- Deploy and maintain websites via FTP, performing UI testing, debugging, and optimization to ensure layout consistency, performance, responsiveness, and overall quality.

Technologies I Work With

Web: HTML5, CSS3/SASS, JavaScript, Bootstrap, Tailwind CSS, Vue.js, Node.js, Express.js, PHP, MySQL, WordPress, Wix, Firebase, Supabase

Domain & Hosting: GoDaddy, Hostinger, Namecheap
